

DPA DAD6010 ADAPTER MicroDot to TA4F connector

Stock code

74-130

Brand

DPA (DPA Microphones)

Model number

DAD6010

MicroDot Adapter

DPA MICROPHONES - MicroDot adapters and cables

A range of DPA MicroDot adapters and connecting cables that allows the user to extend the distance from microphone to source, along with add compatibility for different wireless system input type.

MicroDot Adapter

The adapters for wireless systems give you flexible, simple and affordable possibilities, and allow the user to switch the same microphone between transmitter types, or standard 48V phantom power, 3-pin XLR.

Note that the adapters contain circuitry to pass the correct supply voltage to the microphone, so may not be suitable for use with other miniature microphones. Adapters are available for most UHF transmitters. If an adapter is required for a transmitter not listed here, please contact Technical Support.

CM 16 Extension cable

A MicroDot Extension Cable for any DPA miniature microphone. The Kevlar reinforced cable is compatible with any DPA **MicroDot adapter**. Cable diameter: 1.6mm. Length: 1.8m option.

CM 22 Extension cable

A Kevlar reinforced, heavy duty MicroDot Extension Cable for any DPA miniature microphone. The thicker and more sturdy (in comparison to **CM16**) allows compatibility to any DPA MicroDot and is 'perfect for use in physically-challenging environments' like the live stage. Cable diameter: 2.2mm. Length: 1.8/5/10/20m options.

DAO4010, DAO4020 Extension cable

An installation solution that uses Mogami cable and an ultra-slim XLR housing. It is a cable for suspension or minimal visual appearance, adding only a few millimeters extra length to the microphone.

Most of the connector will be locked and hidden within the microphone, leaving an elegant looking solution for applications in concert halls, conference rooms, TV Broadcast or live sound reinforcement where minimal visual appearance is appreciated. This cable

is available in 10m (33 ft) and 20m (66 ft) lengths.
