

Relevé

Light that moves you

We've combined a decade of LED optical engineering with four decades of theatrical design into an automated fixture specifically for the theatre. Concerts, dance recitals, plays, musicals, community events, orchestra shows, band concerts and anything else that might find its way onto your stage – is elevated with Relevé Spot.

Color Integrity

The calibrated, four-color, additive mixing system of Relevé Spot offers brighter reds, more vibrant greens, and deeper blues than any other automated luminaire. Saturated colors pop and pastels shine bright.

Mix infinite shades of warm and cool whites, every hue of your favorite reds and blues, or the perfect sunset or sunrise... all using the even and calibrated color mixing you've come to expect from ETC.

Pattern and Texture

The Ani-gobo wheel will quickly become one of your favorite features of Relevé Spot. Pair it with the customizable, rotating gobo wheel and create textures like never before. Add in the perfectly theatrical frost for next-level visuals that you'll have to see to believe.

Dimming and Performance

Many theatrical productions require slow, smooth fades to zero, and Relevé Spot delivers. With the ability to mimic the long dims of incandescent as well as the quick snap of LED fixtures, you get the best of both worlds.

Relevé Spot always knows when it's home. Using Whisper Home technology, you see minimal movement at start up, and can rest assured these fixtures will never detract from the show running on stage. Program precise parameters of the fixture so it never rotates into a nearby pipe, balcony rail, catwalk, or another fixture.

Relevé Spot

Silent sophisticated movement, high quality light, impressive effects, and effortless dimming - the automated fixture designed for your performance space.
