

# LED Automated Lighting

## LED Automated Lighting

Our fixtures have pioneered the advancement of automated lighting technology for over thirty years. ETC's latest innovations offer something for every need, with punchy beams, framing shutters, saturated washes, and spectacular effects. Ready to take your light show to a new level? We've got the tools.

## Halcyon

Created to meet the needs of rental operations, theatres, and opera houses, [Halcyon](#) Gold, Titanium, and Platinum are a family of framing fixtures designed for the exacting demands of lighting production. Offering reduced cost, reduced weight, and increased output, Halcyon fixtures are each best in class and engineered to fit into every spec for every design.

- Full curtain framing shutters
- Ultra-Bright and High Fidelity engine options
- Matching feature sets and performance across all fixtures

## Lonestar and Hyperstar

Built for those who want maximum performance from mid-sized automated fixtures, [Hyperstar](#) and [Lonestar](#) are compact and brilliant, without sacrificing features or output. Lonestar features full curtain framing shutters, while Hyperstar adds 11 fixed patterns to its feature set. Both luminaires include nine rotating patterns, animation wheel, plus dual frosts and prisms.

- 15,400 lumen output
- CMY mixing, linear CTO plus fixed color wheel
- Limitless morphing and texture layering options

## Ministar

Ministar is an affordable, powerful High End Systems luminaire with a host of unique looks for a variety of venues. With dual color wheels, dual pattern wheels, variable frost, prism and zoom, [Ministar](#) fits the spec for a bright, compact, and versatile luminaire.

- 9,700 lumen output
- VersaColor providing 60 unique colors plus 64 QuadraTech split colors
- Rotating and fixed gobo wheels

## Sola Silent

[SolaFrame Studio](#) and [SolaFrame Theatre](#) are fanless, convection-cooled automated luminaires that prioritize high quality features, spectral output, and above all silence. With efficient operation, full curtain framing shutters, exquisite projection control, and beautiful color rendering, these silent fixtures are designed for productions where ambient fixture noise levels are not acceptable.

- Silent operation
- Full curtain framing shutters
- High CRI engine

## SolaPix

[SolaPix](#) takes the traditional concept of a pixel wash and pushes it to its maximum potential, enveloping your production with beautiful, saturated color. With a plethora of looks to help set the mood and steal the show, SolaPix features an additive LED, RGBW color mixing system for extremely powerful colors and tunable white control, a versatile 4.5° - 60° zoom range, and pixel mapping on all models.

- FleX Effects Engine
- Halographic Pixel Definition
- Customizable macro control
- IP65 SolaPix 19 XT version available

## SolaHyBeam 3000

With a feature set designed for beam control, aerial effects, and raw power, **SolaHyBeam 3000** features a large front aperture and optimized long throw optics for superior light output throughout the fixture's wide zoom range.

- Superior projection, wash, and beam capabilities
- 37,000 lumen output
- Ultra-Bright or High Fidelity Engine

## Relevé Spot

An automated fixture designed specifically for the theatre, [Relevé Spot](#) uses the calibrated ColorSource Deep Blue four-color additive mixing system and offers brighter reds, more vibrant greens, and deeper blues than most event-focused automated luminaires.

- Ani-gobo wheel
- Five-position rotating gobo wheel
- Iris, frost, and zoom

## Effects

The perfect complement to the High End Systems automated fixture range, [SolaPix](#) and [Talen](#) are engineered for the designer who craves stunning new looks. Each luminaire is designed to bring unique visuals not seen a thousand times before, giving a bold new twist on classic effects lighting and beyond.

- Additive LED engine
- 2800 K - 8000 K color temperature
- Perfect for use on camera as face lights

## Cyberlight LED

**Cyberlight LED** brings the unique benefits of classic moving mirror technology into a modern design. Customers with existing mirror fixtures in the themed entertainment market and elsewhere can retrofit those products with Cyberlight LED for more energy-efficient operation and service.

- Bright white 470 W High Integrity color rendering engine produces 12,750 lumens
- Break resistant mirror produces fast pan and tilt movement
- CMY mixing, linear CTO plus fixed color wheel
